

A Level Physical Education

Why study PE?

Studying A Level Physical Education will give you a fantastic insight into the amazing world of sports performance. Not only will you have the chance to perform or coach a sport through the non-exam assessment component, you will also develop a wide-ranging knowledge into the how and why of physical activity and sport.

The combination of physical performance and academic challenge provides an exciting opportunity for students. You can perform, and then through the academic study improve your performance or coaching through application of the theory.

Physical Education is studied through a range of different contexts and the impact it has on both ours and other's everyday lives. You will learn the reasons why we do things, why some people outperform others, mentally and physically. You will also delve into the ethical considerations behind the use of drugs and the influence that modern technology is having in and on physical activity and sport.

The development of our Parkin Sports Facility offers a wonderful environment for our students to work in. Students will have their theory lessons in our purpose-built classroom, as well as having the opportunity to use our strength and conditioning gym and sports hall for their practical lessons.

Entry requirements:

A grade 7 in PE or Biology, but a 6 would be considered.

What does the course involve?

Component 01:

Physiological factors affecting performance: 1.1 Applied anatomy and physiology 1.2 Exercise physiology 1.3 Biomechanics.

Non-Exam Assessment (NEA). One practical performance, as either a coach or a performer in an activity.

NEA. One Performance Analysis task.

A total of four hours assessment split over three examination papers (2 x 1 hour and 1 x 2 hour) taken at the end of the two-year course.

A wide range of question types including single mark, short answer and extended response questions

The opportunity to demonstrate your knowledge of both theory and performance skills in both your NEA and through the examinations.

What can an A Level in PE lead to?

A Level Physical Education is an excellent base for a university degree in sports science, sports management, healthcare, or exercise and health. Physical Education can also complement further study in biology, human biology, physics, psychology, nutrition, sociology and many more.

A Level Physical Education can open up a range of career opportunities including sports development, sports coaching, physiotherapy, personal training or becoming one of the next generation of PE teachers. The transferable skills you learn through your study of Physical Education, such as decision making and independent thinking are also useful in any career path you choose to take.

What skills will be developed in the PE A Level course?

Throughout the two-year course you will have the opportunity to develop many transferable skills including decision making, psychological understanding of people, independent thinking, problem solving and analytical skills as well as thinking and acting under pressure.

PE is taught by PE teachers across the Foundation.
